

**Alchemy**  
**KS1**  
**Tuesday - Myths**

Alchemy is an ancient science that came before chemistry. The aim of alchemy was to try and change certain materials and substances into other materials. The main goal of many alchemists was to try to create The Philosopher's Stone. A special substance that could bring immortality to the holder. Today we know that this is not real. It is a myth.

Here are some other myths. These are all creatures. What can you find out about these mythical creatures. Find 3 facts about each one.

Phoenix

Griffen

Dragon
