Tuesday - Humanities

Can you identify these animals?

These animals all have one thing in common - they are endangered.

What does the word endangered mean?

You are going to create a fact file for 4 different animals. You must include a bit of information about the animal and why it is endangered.

You could choose animals that I have put in the pictures or you could choose your own.

This website might help you but you can also do research on other websites or from books.
