Bar Charts

In your garden or on a walk count the number of different flowers you see.

Count how many:

Daisies

Buttercups

Daffodils

Dandelions

Did you see anything else?

Draw a table and a bar chart to show what you found.

Extension

You could also do this for animals that you see on your walk.

Count how many:

Dogs

Cats

Squirrels

Birds

Did you see any other animals?

Draw a table and a chart to show what you have found. Use a different type of chart from a bar chart e.g. a pie chart.
